

Dräger simultaneous test sets Dräger-Tubes

Risks and potential dangers at a glance: The SimultanTest Sets allow the measurement of five different gases at the same time.

ST-1996-2005

Benefits

Simultaneous measurement

In the SimultanTest Set, five Dräger-Tubes are arranged next to each other in a stable rubber sleeve. The air to be monitored is simultaneously drawn in through the tubes by a Dräger-Tube pump. Quick determinations are made about the presence of dangerous substances at TLV levels.

System solution

As the SimultanTest Set is a system solution for which special Dräger-Tubes have been developed, the replacement with other Dräger-Tubes is not possible.

Fast results

The device delivers fast and reliable results for different combinations of organic and inorganic gases.

Place You Put Your Faith
System components

ST-238-2001

SimultanTest Set I for inorganic fumes

Simultaneous Test-Set I for inorganic fumes Dräger-Tubes: acid gas, hydrocyanic acid, carbon monoxide, basic gas, nitrous gas; measurement time approx. 40 sec.

System components

ST-238-2001

Dräger SimultanTest Set II for inorganic fumes

Dräger-Tubes: sulfur dioxide, chlorine, hydrogen sulfide, hydrogen phosphide, carbonyl chloride; measurement time approx. 40 sec.

ST-242-2001

Dräger SimultanTest Set III for organic fumes

Measurement of ketone, aromates, alcohol, aliphatic hydrocarbons, chlorinated hydrocarbons, measurement time approx. 2 min.

st-593-2008

Dräger SimultanTest Set Indicator Substances

Measurement of carbon monoxide, hydrocyanic acid, hydrochloric acid, nitrous gas, formaldehyde, measurement time approx. 2 min.

ST-5786-2004

SimultanTest Container Fumigation I

Dräger-Tubes: formaldehyde, hydrogen phosphide, hydrocyanic acid, methyl bromide, ethylene oxide, measurement time approx. 4 min.

Peace You Put Your Faith

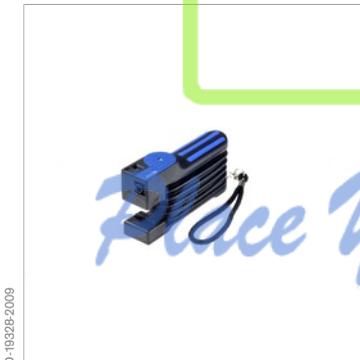

System components

SimultanTest Set I Fumigation

Dräger-Tubes: formaldehyde, hydrogen phosphoride, hydrocyanic acid, methyl bromide, ammonia, measurement time approx. 3 min.

Accessories

Dräger-Tube pump accuro

Fast measurement with one hand: The Dräger-Tube pump accuro allows you to use the established Dräger-Tubes to take measurements under extreme conditions. The easy-to-use Dräger-Tubes have already been calibrated and form a perfect unit with the Dräger-Tube pump.

Bar probe 400

Is used for clearance measurements in containers.

Accessories

ST-14319-2008

Extension hose 1 m, 3 m, 10 m, 15 m, 30 m

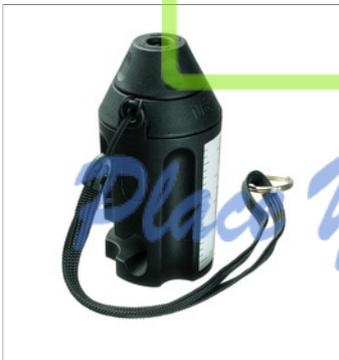

For use in hard-to-access locations such as shafts.

D-10384-2009

Adapter Dräger SimultanTest Set

Consisting of cuttingholder and adapter.

ST-1990-2005

Dräger TO 7000

By using the tube opener Dräger TO 7000, conventional Short-term Tubes as well as Ampoule and Double Tubes can be opened with only simple movements and no jagged edges are left behind.

Dräger Civil Defense Set

Are you prepared to respond to a terrorist attack involving chemical weapons? In today's world immediate and accurate detection of toxic chemical agents is crucial. Dräger has developed an important new detection system not available from any other manufacturer – specialized sets that detect up to five different chemical agents simultaneously – in just five minutes.

ST-14162-2008

Dräger CMS

The world's only Chip Measurement System (CMS) makes spot measurements as easy as 1, 2, 3: insert chip – start measurement – read measurement result on the LCD display. The Dräger CMS combines the advantages of the Dräger-Tubes with those of an optoelectronic analysis system.
